

COMPLETE CARE: ADVANCED BED BUG PROTECTION FOR YOUR HEALTHCARE OPERATION

Encountering bed bugs is uncomfortable no matter where it happens. But a bed bug incident in a healthcare facility is even more concerning.

It is nearly impossible to prevent these blood-sucking, hitchhiking pests from being introduced to your facility. In some healthcare environments, bed bugs can hide in the smallest cracks and crevices, emerging to bite health-compromised patients. Worse, they can quickly spread to other areas.

Your best defense is to have a bed bug plan in place. With Rentokil, you have more than a plan. You get a dedicated partner committed to a rapid response and ongoing protection that keeps working long after treatment, backed by an unmatched industry-leading warranty.

EYE-OPENING CASE STUDY

A 13-month study at a 900+ bed Ohio hospital found that the hospital had 180 bed bug incidents during the study period – 1 every 2.2 days

Costs per treatment ranged from \$125 - \$1,050.

In total, between the emergency department and inpatient operations, the hospital spent \$78,759 on bed bug treatments over the course of the study.

COMPREHENSIVE COVERAGE THAT'S RIGHT FOR YOUR BUSINESS

Due to the sensitive nature of their environment, healthcare facilities have unique challenges with treating bed bugs. We offer two packaged levels of protection so that you can select the best coverage for your operation.

Choose from our Protect+ Essential or Extended packages. Our Extended package provides an additional layer of protection by offering a warranty that keeps biting bed bugs from disrupting your care environment.

	Protect+ Essential Sensitive Areas	Protect+ Extended Non-Sensitive Areas
